Notes:

*Unaudited Statement - Without accompanying discussion this document is incomplete

**HRSA Voucher Funding - there may be a slight variance between what has been reported as HRSA Voucher Funding compared to what has been recorded as an expenditure this is due to timing of Federal Funding draw down requests.

In accordance with Accrual based accounting procedures DHA recognizes Revenue in the period that the services are rendered and payments are anticipated to be collected. In addition, Employer/Individual Cost of Coverage expenditure is recognized during the period which payment is rendered for invoiced services. DHA does encounter instances where Employer/Individuals do submit payments prior to the month when services are to be rendered. These "pre-payments" have been reviewed and addressed during the year-end close process with a Deferred Revenue entry.
